  - Checking this box adds a drop-down box to select which disaster the taxpayer experienced, which allows tax relief based on the disaster relief act for that disaster, for example:

    - Increase the limit on charitable contributions.
    - Suspend tax on early distributions from an IRA.

Statutory employees receive Form W-2 for their pay and have taxes withheld; however, they report their income and deduct their expenses on Schedule C. Copy box 1 to Schedule C income.
- Retirement Plan Box: If this box is checked, the employee participated in the employer's retirement plan.
- State Section: If this section is blank, select **California**, enter the state EIN, and copy the wages from box 1 to box 16. If this is not done, these wages will not be applied towards earned income in California.
- If taxpayer has an ITIN and it does not match the SSN on the W-2, use the ITIN for the return and enter the SSN on the W-2 as shown.

## Medicaid Waiver Payments (MWP)

- Also called In Home Support Services (IHSS).

    - If care provider did not live with care receiver all year, pro-rate the value based on time together.
  - To include the excluded MWP for EIC and ACTC:
    - Check the box directly above the MWP box.
    - This may give the taxpayer too much income to qualify for the credit, so make sure the amount of the refund increases.
- On a CA return, MWP can be either included or excluded as earned income.
  - Box 1 is the taxable income (always enter as shown on W-2)
  - Box 16 is earned income (copy from box 1 or change to 0 to exclude from earned income).

Federal Not Taxable	Federal Not Earned	CA Earned

- **Date Acquired**, select **Various Short Term** or **Various Long Term**.
- **Date Sold**, enter the date of the latest sale.
- Do not select the **M** option for reporting multiple entries on one line (even though this is what it is for) because it causes form 8453 to be printed with the tax return. This form is used for sending additional information to the IRS and it is not used by Tax-Aide. The IRS will ask for additional documentation if they want it.
- If there is a wash sale, enter it as a positive number in the **Adjustments** field and check code **W**.
- Losses on the sale of investment assets are deductible; losses on personal-use assets are not.
- Gains on the sale of all assets are taxable.
- In community property states (e.g., California), when either spouse dies, the basis of community property (e.g., stock) becomes the current fair market value of the property.
  - Basis on brokerage statement is likely to be the original basis, not the stepped-up basis.
  - If taxpayer is widowed, look for stocks that were purchased before the death of the spouse and verify the basis with the taxpayer.
- If taxpayer cannot provide the basis on property received as a gift, it is out of scope.

## Capital Loss Carry Forward

  - Schedule D, line 21 will be -3000 and it will be less than line 16.
  - The amount to be carried forward can be found on the Capital Loss Carryover Worksheet, lines 8 and 13.
- When determining the amount of loss to carry over to next year, you reduce it by the amount you are allowed to deduct this year whether you need it or not and whether you filed this year or not.

## Inherited Assets

- Are always treated as a long-term gain or loss.
- For the date acquired, select **Alternate Option->Inherited - Long Term**.

## 1099-R – Retirement or Pension Distribution

- Used for IRA and pension distributions.

- The IRA/SEP/SIMPLE checkbox in box 7 tells you which one it is.
- CSA 1099-R is always a pension.
- RRB 1099-R is the equivalent of form 1099-R for railroad employees,
  - Entered on a separate page in TaxSlayer.
- CSA 1099-R is the equivalent of form 1099-R for U.S. government employees (civil service)
  - Entered on 1099-R page in TaxSlayer.
- Taxable amount not determined is always checked for a traditional IRA.
  - Taxpayer needs to know if there is a basis, otherwise fully taxable.
- Does not carry to the form 8880 checkbox
  - Distributions will normally offset contributions and therefore reduce the Saver's Credit.
  - If the 8880 checkbox is checked, this distribution will not offset the contributions.

    - If box 5 or 9b has a value and not an IRA, use the Simplified Method.
    - Otherwise, make the whole amount taxable.

- Box 7
  - See pub 4012, D-52 for a description of the codes in this box.
- Box 9b
  - This is the amount of after-tax contributions that were made.
  - If taxable amount not determined, the taxable amount of the distribution in box 2a needs to be calculated.

  - Plan cost at annuity start date is from 1099-R, box 9b.
  - **Starting date of annuity** is the date of retirement.
  - Death benefit exclusion can be ignored.

## Foreign Currency Conversion

- Use the [IRS Average Annual Exchange Rate](#) and add 2% for the bank's commission on the exchange.
- Exchange rate is the number of foreign dollars that equals one U.S. dollar.

Foreign Currency / Exchange Rate = U.S. Dollars

U.S. Dollars \* Exchange Rate = Foreign Currency

For example,

\$1000 Canadian / 1.370 = \$730 US  
\$1000 Euros / 0.924 = \$1082 US

\$730 US \* 1.370 = \$1000 Canadian  
\$1082 US \* 0.924 = \$1000 Euros

## Gift Tax

Annual gift tax exclusion .....\$19,000  
Lifetime gift tax exclusion .....\$13.99 million

- A gift is a voluntary transfer of property from one person to another benefit to the donor.
- Each recipient may receive \$19,000 per year.
- Taxpayer may give gifts to any number of recipients.
- Taxpayer and spouse may give to the same recipient.
- If any gift exceeds the annual gift tax exclusion, you must file a gift tax return with the IRS, and the excess of your contribution will be added toward your lifetime gift tax exclusion.
- Once you exhaust your lifetime exclusion, you may begin to owe gift taxes.
- Gifts are not taxable to the recipient.
- Except charitable donations, gifts are not deductible to the taxpayer making the gift.

  - Add \$1,000 if the owner is age 55 or over.
- Excess contributions are assessed a 6% penalty every year until withdrawn; out of scope if not corrected by due date of return.

### FICA Tax

FICA tax is a tax on wages that pays for Social Security, Medicare, and the Affordable Care Act.

Social Security Tax = 6.2% of wages on first \$127,200.  
Medicare Tax = 1.45% of wages  
Affordable Care Act = .9% of wages above \$200,000 if filing single or \$250,000 MFJ.

An additional Medicare tax of 3.8% is imposed on unearned income if MAGI is greater than \$250,000 if filing MFJ or \$200,000 if single.

For self-employed taxpayers, the tax is referred to as self-employment tax and the Social Security and Medicare taxes are doubled (but not the ACA Tax). The limits remain the same. Also, there is a 6% FUTA tax (unemployment tax) paid by employers on the first \$7000 of wages.

## Definitions

**199A Dividends** See *Section 199A Dividends*.

**Abandoned Spouse** allows a married taxpayer with a dependent child whose spouse did not live in the taxpayer's home during the last six months of the tax year to file as head of household rather than married filing separately.

**Accounting Method** is the way the taxpayer accounts for their income and expenses. Cash accounting method reports income when it is received and deducts expenses when paid. The accrual accounting method reports income when earned and deducts expenses when incurred.

**Accrual Method of Accounting** See *Accounting Method*.

**Adjusted Gross Income** (AGI) is gross income (all taxable income) minus adjustments (also called above the line deductions). Adjustments are deductions the taxpayer can take even if they do not itemize deductions.

$$\text{adjusted gross income} = \text{gross income} - \text{adjustments}$$

**Adjustments** (also called above the line deductions) are deductions that the taxpayer can take even if they do not itemize deductions (for example, retirement plan contributions). They are subtracted from gross (taxable) income so they reduce the taxpayer's adjusted gross income (AGI). The standard deduction and itemized deductions are subtracted from AGI; they do not lower the taxpayer's AGI. The distinction between adjustments and deduction is important because AGI is used in many tax calculations.

**Alien** is a person in the country that is not a U.S. citizen. If the person has been issued an alien registration card (also called a green card, although it is no longer green) they are a resident alien (or if they pass the substantial presence test); otherwise, they are a non-resident alien.

**Amortization** is reducing the cost of an asset over its projected life. See also *depletion* and *depreciation*.

**Basis** is the original cost of an asset.

**Blind** A person is considered to be blind if they have a statement from a doctor that their vision is worse than 20/200 in their better eye with glasses or their field of vision is less than 20 degrees.

**Capital Gains** are gains derived from the sale of investments.

**Cash Method of Accounting** See *Accounting Method*.

**Community Property State** means the law presumes all property acquired during the marriage is owned equally by both spouses. As a result, the court will divide marital property equally if spouses later divorce. The length of the marriage does not affect the division of assets and debts. California is a community property state.

**Covered Security** is a security that the brokerage is required to report the cost basis to both the taxpayer and the IRS. For a non-covered security, the reporting is sent only to the taxpayer. Since January 1, 2011 most stocks traded in the U.S. are covered securities.

**De Minimis** is Latin for "about minimal things". It refers to an amount that is inconsequential.

**De Minimis Safe Harbor Election** allows the taxpayer to set a capitalization threshold so that all amounts that fall below that number are not capitalized for federal tax reporting purposes. This is particularly advantageous for taxpayers who tend to capitalize large amounts of "low dollar" fixed assets including items such as office and computer equipment, software, and office furniture.

**Deduction** is an expense that can be deducted from the taxpayer's AGI when itemizing deductions. It reduces the amount of income that is taxed.

**Dependent** is the qualifying child or qualifying relative of the taxpayer (a spouse is a personal exemption, not a dependent).

**Depletion** is deducting the reduction in value of an asset as that asset is used up. See also *amortization* and *depreciation*.

**Depreciation** is deducting a portion of an asset's acquisition cost over the period of its useful life. See also *amortization* and *depletion*.

**Disabled** A person is considered permanently disabled if they cannot engage in any substantial gainful activity because of a physical or mental condition, and a doctor determines the condition has lasted or can be expected to last continuously for at least a year or can lead to death (basically, the taxpayer cannot perform a paying job).

**Dividends** are the most common type of distribution from a corporation or mutual fund. They take some amount of capital from a company's equity and redistribute it to shareholders based on the number of shares they possess. Unless stated otherwise, dividends are ordinary dividends. Ordinary dividends are taxed as income. Qualified dividends are taxed as long term capital gains.

**Earned Income** is income received for work (for example, wages or business income). Unearned income is income not earned from work (for example, unemployment income or income from investments. investment income (for example, rental income, dividends, and capital gains).

**FICA Tax** is a tax on wages that pays for Social Security, Medicare, and the Affordable Care Act.

**Green Card** See *Alien*.

**Gross income** is all income received in the form of money, goods, property, and services that is not exempt from tax. Income that is not taxable is not included although it may still need to be entered on the tax return (for example, qualified dividends and some portion of Social Security benefits).

**Individual Retirement Arrangement (IRA)** See Traditional IRA, Roth IRA, SIMPLE IRA, or SEP IRA.

**Modified Adjusted Gross Income (MAGI)** is computed by taking the taxpayer's AGI and adding back certain deductions and excluded income, such as foreign income, student-loan interest, IRA contributions, one-half of self-employment tax, and deductions for higher-education expenses. It is common for the MAGI to be the same as the AGI. MAGI is used to determine whether the taxpayer qualifies for certain tax deductions (for example, how much of an IRA contribution is deductible).

**Multiple Support Agreement** is used two or more people who could claim the person as a dependent (except for the support test) together provide more than half the dependent's support. In this situation, the individuals who provide more than 10% of the person's total support, and who meet the other tests for a qualifying relative, can agree that one of them will claim the person as a dependent for any applicable tax benefits. The person claiming the dependent must file form 2120. Multiple Support Agreements apply only to a qualifying relative, not to a qualifying child.

**Municipal Bonds** are bonds issued by states, counties, and cities. They are federally tax free and they are state tax free if they are issued in the taxpayer's state.

**Non-covered Security** See *Covered Security*.

They assign a code to all tax software companies. In the case of TaxSlayer, it indicates that the tax forms were prepared using either TaxSlayer Pro Desktop or Pro Web software.

**Recourse Debt** holds the borrower personally responsible. All other debt is non-recourse debt. With a non-recourse debt (loan), the lender can only take the collateral if the borrower defaults. With a recourse debt (loan), the borrower is still responsible for the remaining debt if the collateral does not cover the debt.

A non-refundable tax credit can only be used to offset taxes owed.

It is computed by taking the gross income, subtracting the adjustments (also called above the line deductions), subtracting the exemptions (exemptions are currently reduced to \$0), and subtracting either the standard deduction or the itemized deductions (below the line deductions).

A child in the process of being adopted will need an ATIN to claim the child as a dependent.

**Traditional IRA** is a retirement account set up by an individual. Generally, a person makes contributions to the account using money before taxes on it (before-tax dollars).
